

# MATH PLAYGROUND

A MathAdventures.com Publication

## TABLE OF CONTENTS

### math interviews

Gilbert Labelle  
Nathalie Sinclair  
Karen Yeats  
Carolyn Kieran  
Chris Essex  
Ved Madan  
Walter Whiteley  
Ann Kajander  
Rene Descartes  
Euler  
Plato  
city engineer  
bank manager  
investment analyst  
geologist  
real estate agent  
truss plant manager  
farmer  
technology company VP  
moving company manager  
circle  
one-half  
square  
triangle  
6, the perfect number  
x  
zero  
infinity

### family math

### about

### math e-stories

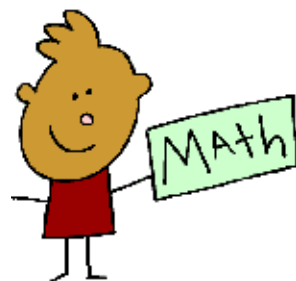

Scruffy  
pi  
negatives  
square  
fraction friends  
triangles  
Molly's race  
a friend lost  
smoking  
lost socks  
waiting for the bus  
consecutive sums  
math magic

### data/probability

what is it?  
one die games  
two dice games  
probability stories  
heads or tails?  
fair games  
lotteries  
flipping theory  
hop in the pond  
spinners  
probability & pi  
Pascal's triangle  
misconceptions

### number

100 chart  
guess my number  
sums 1  
sums 2  
sums 3  
differences 1  
differences 2  
products  
quotients  
license plates  
fractions  
repeating decimals  
integers  
integer sums  
integer products  
history of infinity  
dividing by zero  
counting infinity  
infinite series  
what is a limit?  
math race

### pattern/algebra

what is algebra?  
skip adding  
skip multiplying  
100 chart  
odd one out  
growth patterns  
ordered pairs  
coordinate rules  
points & equations  
points and lines  
making 10  
dive with fish  
zoom, zoom  
walk a graph  
math in the tub  
fill it up  
pick a number  
algebraic expressions  
algebra operations  
binomial product  
linear equations1  
linear equations2  
linear equations3  
simplifying equations  
mixtures parabolas  
various functions  
limits & graphs  
what is a tangent?  
what is Calculus?

### geometry

Vedic square  
crosswords  
tile patterns  
mystery points  
flatland  
parallel lines  
lines in 3-space  
rigid shapes  
loopy shapes 1  
loopy shapes 2

### measurement

lefthandedness  
close encounters  
coins paradox  
math travels  
spaceship Earth  
in the woods  
area & perimeter  
slippery areas  
serpent with corners  
biggest box  
underground  
volumetrics  
volume & surface area  
bowling
