

When is an A not an A?

Assessing Levels of Mathematical Thinking

What if ... ?

Why ... ?

How ... ?

What ... ?

What is an A?

Level-specific tasks

Rich learning tasks

Reproducible tasks and tests

TABLE OF CONTENTS

1	When is an A not an A?
2	What is an A?
3	What, how, why and what if
4	Rubrics and level-specific tasks
5	Ranking tasks
9	Designing level-specific tasks
10	Ranking curriculum expectations
11	Designing level D tasks
12	Designing level C tasks
13	Designing level B tasks
14	Designing level A tasks
15	Designing tests with level-specific tasks
16	Should I label tasks?
17	How many tasks should I include in each level?
18	How do I come up with a grade?
20	How do I ensure consistency?
21	Sample test – circle area and circumference
25	Marking scheme – circle area and circumference
29	Record keeping
31	Rich learning tasks
32	What is a rich learning task?
33	Sample test – surface area and volume relationships
37	Marking scheme – surface area and volume relationships
41	The assessment and instruction link
42	Changing assessment and instruction
43	Level C and D learning
44	Steps in the right direction
45	More level-specific tasks
46	Area and perimeter relationships
52	Fractions
57	Integer addition
62	Ordered pairs and straight lines
67	Circle circumference
73	Motion graphs
78	Quadratic functions
83	References
